**Weekly Price of Cotton**  
By the end of 01 December 2024: ₹ 7,381/qtl.

**India’s cotton production for the 2024-25 season is forecast to drop by 7.4% to 30.2 million bales due to reduced planted area and crop damage from excessive rainfall.**

**The USDA also revised its India production forecast down to 30.72 million bales, further tightening supply.**

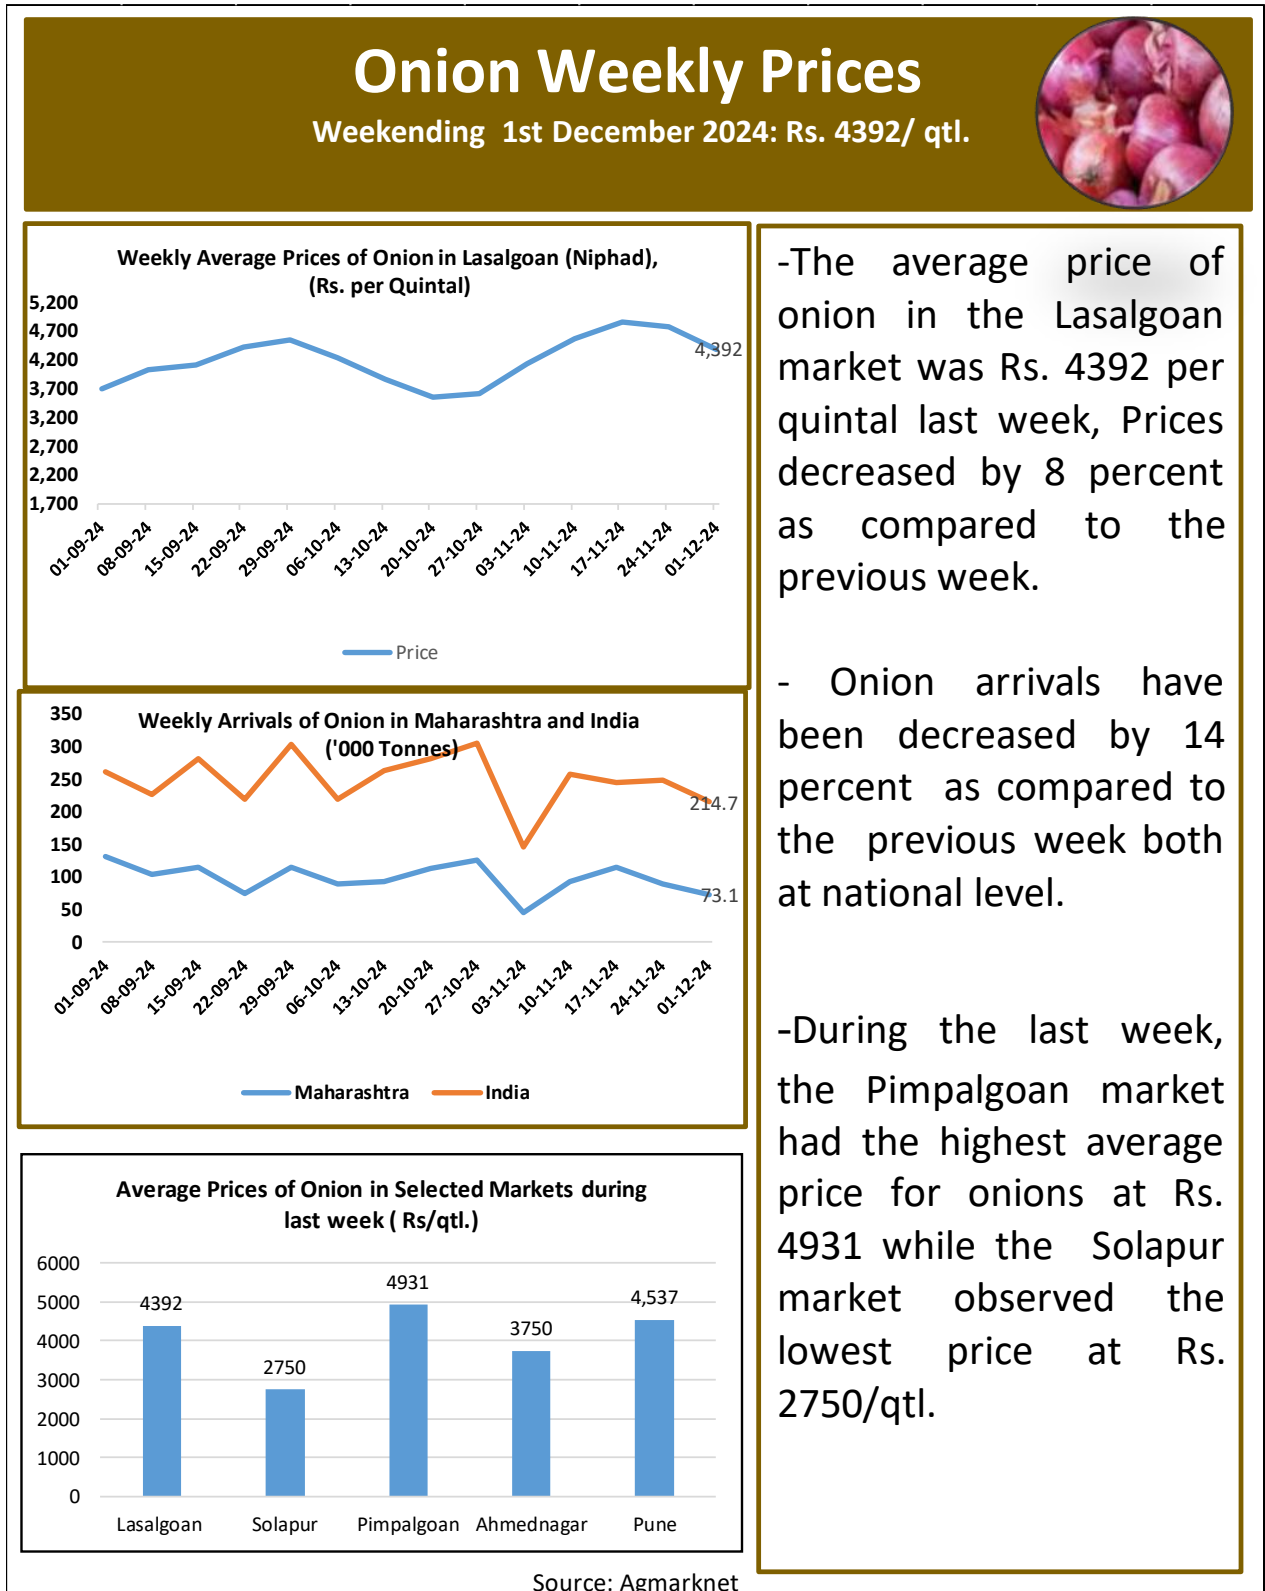

**This decline in domestic production is expected to reduce exports and increase the need for imports, which are projected to rise to 2.5 million bales from 1.75 million bales in the previous year.**

**Cotton production is projected to increase in China, Brazil, and Argentina, more than offsetting reductions in the US and Spain**
